DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/06/2005 has been entered.

Information Disclosure Statement

2. The information disclosure statement filed 06/06/2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. Items on the list are missing from the application file (see 1449 send to applicant). Applicant is required to submit a legible copy of missing documents.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 26, 28 and 31 are rejected under 35 U.S.C. 102(a) as being anticipated by C. Wayne Smith (Archaeological preservation research laboratory report 11, 1998).

Regarding claim 26:

C. Wayne Smith discloses a method for compositional analysis of chemical units of a sample polymer (page 1-2), comprising: (A) applying an experimental constraint to the sample polymer to modify the sample polymer (page 1-2), (B) detecting a property of the modified sample polymer (page 5, table 2); (C) comparing the modified sample polymer to a reference database of polymers of identical size as the polymer (page 4), wherein the polymers of the reference database have also been subjected to the same experimental constraint as the sample polymer (page 1-3), wherein the comparison provides a compositional analysis of the sample polymer (page 5, table 2).

Regarding claim 28, C. Wayne Smith discloses the experimental constraint applied to the polymer involves complete degradation of the polymer into individual chemical units (page 5, table 2), and wherein the compositional analysis reveals the number and type of units within the polymer (page 5, table 2); Regarding claim 31, C. Wayne Smith discloses the reference database includes identifiers corresponding to chemical units of a plurality of polymers,

each of the identifiers including a field storing a value corresponding to a property of the corresponding chemical unit (page 5, table 2).

Allowable Subject Matter

4. Claims 27, 29 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all the limitation of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: prior art fail to teach regarding claim 27, use the step of capillary electrophoresis; Regarding claim 29, use of matrix assisted laser desorption ionization mass spectrometry; Regarding claim 30, repeat the reference database fall below a predetermined threshold.

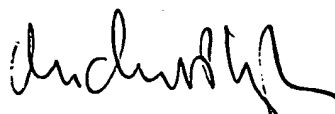

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tung S Lau whose telephone number is 571-272-2274. The examiner can normally be reached on M-F 9-5:30. If attempts to
